# Abstract

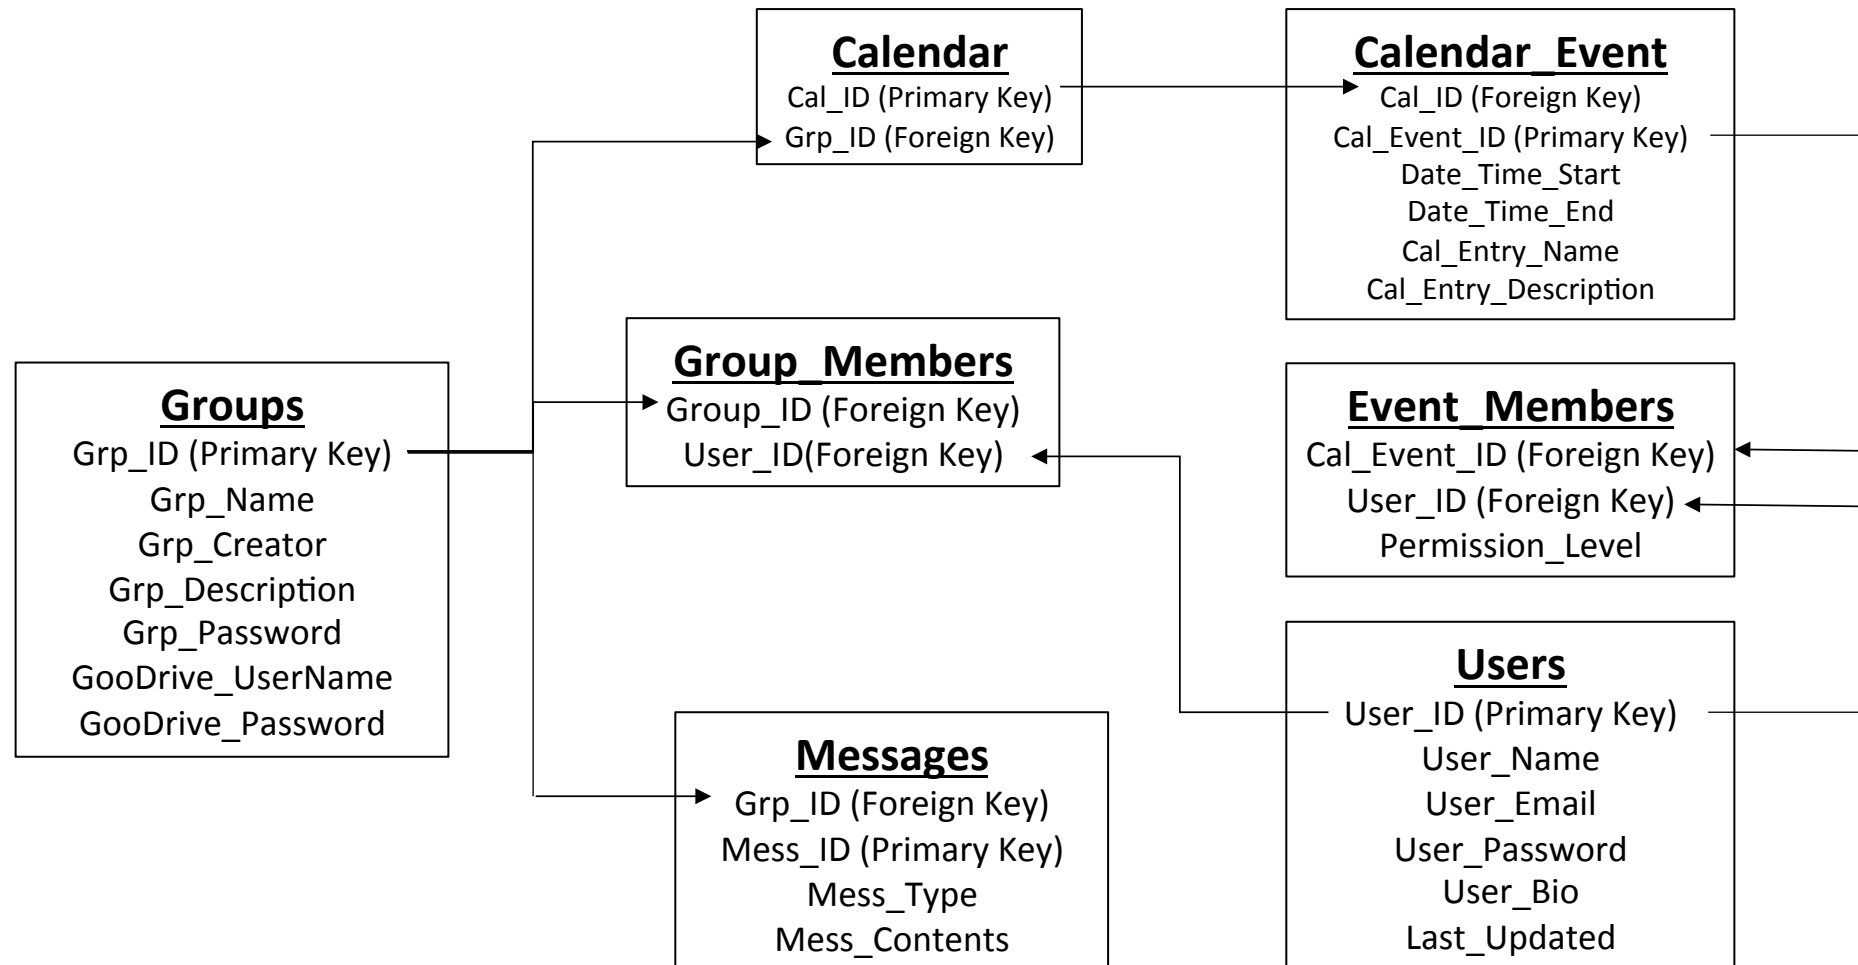

Project Globus is a group management system designed to work for a variety of groups, both casual and professional. Whether it's a group of friends planning a weekly board gaming session, student's working on a school project, or a business team working on a company's next biggest product, project Globus will provide an innovative, simplistic, and versatile experience to keep the group organized via document sharing, group notifications, group calendars and group messaging.

# Goals for October

- ☒ Set up Database
- ☒ Outline Database
- ☒ Begin Android Interface Development
- ☐ Set up Database Tables

# UI Mockup Ideas
